EXECUTIVE SUMMARY

Aerospace engineering student with hands-on experience in aerodynamics, wind-tunnel testing, structures, materials & stress analysis, and MATLAB-based data processing & modeling. Experience with systems controls, root locus design, and lead/lag compensation. ANSYS and SolidWorks experience for designing CD nozzles. 4+ years of leadership experience and proven ability to improve efficiency under my supervision.

PROFESSIONAL EXPERIENCE

BONGIORNO & SON ITALIAN SPECIALTIES Raleigh, NC

March 2025-Present

Supervisor

- Supervised daily front and back-of-house staff, ensuring efficient workflow & food quality
- Managed opening and closing operations, cash handling, inventory control, and scheduling
- Resolved guest concerns professionally while maintaining high service standards
- Maintained a sub-20% labor cost per day, while increasing average sales by 25% over 3 months.

ACE HARDWARE Raleigh, NC

August 2024-March 2025

Supervisor

- Managed daily operations, including inventory management, cash handling, and appliance assemblies
- Fork-lift certified with experience in unloading trucks and moving pallets.
- Ensuring guest satisfaction by providing excellent guest services

LOWES FOODS Wilmington, NC

October 2020-August 2024

Guest Services Manager

- Managed front-end operations, which include scheduling, cash handling, and ordering supplies
- Responsible for all lottery transactions and Western Union transactions
- Conducted all interviews for the store, which included drug tests and orientations.
- Oversaw all training modules for the store
- Improved spotlight sales by 10% and decreased transactional errors while maintaining efficiency
- Achieved an audit score of 95%
- Consistently received a "secret shopper" score of 100%

EDUCATION

NORTH CAROLINA STATE UNIVERSITY

Raleigh, NC

Bachelor of Aerospace Engineering, minor in astrophysics & mathematics

May 2027

BRUNSWICK COMMUNITY COLLEGE

Bolivia, NC

Associates of Engineering

May 2024

Cum Laude Honors

BRUNSWICK COMMUNITY COLLEGE

Bolivia, NC

Associates of Science

May 2022

Cum Laude Honors

ENGINEERING PROJECTS

HIGH-POWERED ROCKETRY CLUB

- Experience with KiCAD and PCB design
- Hands-on experience with carbon-fiber layups
- Conducted payload stress tests and ejection tests

AERODYNAMICS LAB

• CD Nozzle Design - Designed a CD Nozzle in SolidWorks, given certain constraints, then manufactured it using 3D printing techniques. Used ANSYS for CFD Simulations on the nozzle. Tested the nozzle to find Mach number, pressure, density, mass flow rate, and temperature, and compared those results to analytical results found from isentropic relationships given a choked CD nozzle.

CONTROLS LAB

- Used ladder logic for a PID controller
- Designed various circuits using a breadboard, using potentiometers, capacitors, and resistors to control a 12V motor.

RELEVANT COURSEWORK

Aerodynamics I & II • Intro to Space Flight • Aerospace Structures I & II • Stellar & Galactic Astrophysics • Principles of Automatic Controls • Vibrations • Solid Mechanics • Thermodynamics • Applied Machine Learning • MATLAB • AutoCAD • FEA • Modern Physics • Differential Equations • Numerical Analysis • Linear Algebra
